## Achievements

- Women can now understand the quality of raw material and bargain with the supplier.
- The women involved in toilet construction and hand pump repairing have learnt how to keep balance between the demand generation, supply of raw material and accessories, construction of toilets and the accounts.
- They have also learnt the basic of accountancy.
- Problems related to their work were solved during the training.
- They have learnt the proper use of managing their job.
- They were given the information about different types of registers which can be advantages for them to manage the records of their federation also.
